

## Regulatory Compliance Simplified

It is challenging for organizations to comply with an increasing number of regulations (ISO, SOX, FDA, GDPR, COSO...) causing high fines and liabilities. Our solutions for global compliance let you develop a long-term and profitable business in a regulated world.

### Integrated Solutions For Global Compliance

BPA develops software solutions – Quality, Risk, GDPR – with maximal user experience, to improve organizations' processes, products, services and simplify regulatory compliance.

### Developed on a Unique No-Code App Building Platform

Using our intuitive platform, you can extend the solution to your needs and transform spreadsheets into collaborative apps in minutes.

### Built on the Most Powerful Collaborative Technologies

Microsoft Office 365 & SharePoint will turn tedious and antiquated paper systems into a new engaging and collaborative experience for everyone.

As a measurable result, process owners start to be autonomous to pilot their units. A preventive mindset is emerging in the company. The goal to have an integrated management system has been reached, like required by ISO 9001.

**Silo**, Switzerland

“Seeing what is possible to do with BPA and SharePoint opened the appetite to do more business activities in SharePoint replacing Excel Files.”

**Saving Sight**, United States

### ✓ Reach Global Compliance

Reach global compliance for any regulation

### ✓ The Highest Flexibility

Transform spreadsheets into collaborative apps in minutes

### ✓ Ultimate Office 365 Experience

Move to a new engaging experience for everyone

BPA software was chosen “by distance” because of the “greater depth” in the way to manage and display relationships between topics. This flexibility to display contextual information in an elegant interface was not possible with other software. In addition, SharePoint brought the needed features to easily configure anything we wanted.”

**Rolf Hänggi**, Switzerland

## Re-imagine Your Approach to Quality and Compliance Using Microsoft Business Application Platform

Quality and Risk Managers spend time on cumbersome, costly, paper-based systems and often work with siloed departments. The result of using these outdated technologies is an inefficient quality system and poor engagement of collaborators.

### Shift to a Collaborative Experience with Office 365

BPA Quality & Risk Management built on Microsoft Office 365 and SharePoint helps you re-imagine your approach to compliance. With unique collaboration, automation and AI capabilities, you can ensure company-wide alignment to continuous improvement and a preventive mindset leading to quality products and services.

### Microsoft Partnership

Benefiting from the agility of Microsoft and the power of the Microsoft platform, BPA Solutions helps customers to achieve more, leveraging modern, evolving tools and exploring new technology areas. Working alongside Microsoft teams, BPA Solutions has been awarded with the Microsoft Preferred Status and recognized as Charter Member of the SharePoint Business Applications Partner Program.
